

Universal Doors

Add efficiency, safety, and beauty to your existing fireplace with heavy-duty Country Flame Universal Fireplace Doors. Stop the loss of heat up a drafty, open fireplace flue. Radiant heat from the heavy, quarter-inch steel surround, the high-temperature ceramic glass, and the heavy-duty door frames means high BTU output.

Country Flame[®]

by American Energy Systems Inc.

400 SERIES

- Large viewing area with etched glass
- High-temperature ceramic windows
- Air wash (helps keep glass clean)
- Positive-seal airtight design

FAQ

With included hardware, doors install easily and quickly for secure, airtight performance.

Q. How much will Country Flame fireplace doors heat?

A. They are rated at 35,000 BTUs per hour.

Q. Can the doors be installed on masonry fireplaces?

A. Yes. On either masonry fireplaces or the Country Flame fireplace furnace, they increase burn times and provide much more heat than conventional doors.

Q. Can they be installed over rough stone facing?

A. Yes. Fill voids behind frame with insulation or cement.

Q. How long will the doors last?

A. Under normal use, the 1/4" plate steel frame and heavy cast-iron doors should last a lifetime.

Q. Will they hold a fire longer?

A. This airtight system offers the same type of control as high-quality stoves and inserts. Many users report fires that burn overnight.

Q. How do I control the fire?

A. Use the rotary air control on the 400 series and the concealed easy-touch air control on the 500 series for precise regulation.

Q. Are there restrictions on the use of these doors?

A. Yes. They cannot be installed over zero-clearance fireplaces.
